ABOUT ME	Mathematics PhD student at the University of Virginia studying under Ben Hayes. Interested in the connections between functional analysis, operator algebras, and measured group theory.	
EDUCATION	A.B., <i>summa cum laude</i> in Mathematics Occidental College, Los Angeles CA	May 2025
	PhD in Mathematics University of Virginia, Charlottesville VA	August 2025–Present
ASSORTED ACADEMIC ACTIVITIES	• <i>Research Experience for Undergraduates</i>: NSF-REU at East Texas A&M University, member of the Complex Analysis research group under Dr. Mehmet Celik. Studied excess area identities under operators on particular function spaces. • <i>Observations on Weighted Toeplitz Operators and Symbol Constructions in Bergman Spaces</i>: Presentation at Joint Mathematics Meetings 2025. • <i>Understanding Amenability in Discrete Groups</i>: Thesis and presentation for Honors in mathematics. • <i>Extending beyond our limits</i>: Expository discussion of generalized limits given at the Graduate Students Seminar at the University of Virginia.	
TEACHING	Fall 2025: Calculus 2 (Teaching Assistant), Advanced Linear Algebra (Grader) Spring 2026: Elementary Linear Algebra (Teaching Assistant), Survey of Algebra (Grader)
